[How to Install and Configure 'Ansible' Automation Tool for ...](#)

For Ansible, nearly every YAML file starts with a list. Each item in the list is a list of key/value pairs, commonly called a "hash" or a "dictionary". So, we need to know how to write lists and dictionaries in YAML. All members of a list are lines beginning at the same indentation level starting with a "-" (dash and space). More complicated data structures are possible, such as ...
