Re: MerCruiser 3.0 freeze plug locations There is one behind the flywheel on the back. Pray it's not this one, as it means removing the motor, then taking the flywheel off. Start motor on muffs and see if water is leaking from the back, between the block and flywheel. That is the only other one I can think of right now.

Antifreeze is needed to keep coolants in the MerCruiser engine from freezing during the colder months. If antifreeze is not used during the winter, the engine may no longer function. In addition, the boat engine can become damaged by the bursting of pipes as a result of freezing. You will also need gasoline stabilizer for the winter. Here are the steps you need to follow to winterize a marine ...
