You Think That's Bad is a collection of short stories from one of my favorite writers, Jim Shepard. There are eleven stories in the collection, ten of which were previously published in The Atlantic, McSweeney's, The New Yorker, and Electric Literature among other. It is an interesting collection of stories, taking on inadequacy, desperation, loss, heartbreak, love, and alienation.

"Cinematic" is one way to describe Jim Shepard's collection You Think That's Bad (Knopf). Each story takes you to a different place and time; from a British cartographer's circa 1930 exploration of the Arabian desert to a futuristic take on global warming, these exterior worlds are as fantastically fashioned as the characters themselves.

In Jim Shepard's short-story collection You Think That's Bad, characters are pitted against a natural world positively Herzogian in its animosity to man, but the global-warming-abetted flooding, skier-swallowing avalanches, and flesh-rotting heat and humidity are just stand-ins for impending emotional catastrophes whose visibility doesn't make them any more surmountable.

"The stories in You Think That's Bad are powerful reminders that institutions cannot be considered apart from the individuals who populate them.
